ENGLISH

GERMANY

PROFILE

I am software developer based in Novi Pazar, Serbia. Right now I'm focused on Frontend technologies, working with technologies such as Javascript, React.js, Redux toolkit as state management, Responsive web design with Material UI and Bootstrap CSS frameworks. React js is my main tool but i also worked on some full stack applications and applications using databases and authentication provided by Google Firebase. I also worked with the team on some projects

PROJECTS

FOOTBALL APP

- The latest news from world of football, match overview, live results, overview of results of all leagues in the world, top 5 leagues, player statistics, standings. Fetching data from multiple sources. and many other functionalities.
- **Tech used: React JS, Redux toolkit, Firebase.**

CHAT-APPLICATION

- This chat application is built using React and Firebase Realtime Database technologies, enabling users to communicate in real-time and exchange messages efficiently and securely.
- **Tech used: React JS, Redux toolkit, Firebase.**

NETFLIX-CLONE

- This project is a Netflix clone created using the React library for the frontend, Firebase for the backend and authentication, and Stripe for payment integration.
- **Tech used: React JS, Stripe, Redux toolkit, Firebase.**

EXPERIENCE

STUDENT INTERNSHIP   Jun 2023 - Sep 2023

Institute for Development · Internship

- During internship, I was an integral part of a dynamic team tasked with developing a web application. Collaborating with team members to design and refine the user interface (UI) for the web application, leveraging HTML, CSS, JavaScript, and React.
