2021--

ACHIEVEMENTS

CERTIFIED FRONTEND DEVELOPER - IT CAMP CENTAR NIT, NOVI PAZAR

LANGUAGES

SERBIAN: MATERNAL

ENGLISH

GERMANY

PROFILE

I am software developer based in Novi Pazar, Serbia. Right now I'm focused on Frontend technologies, working with technologies such as Next.js, React, and TypeScript, Redux toolkit as state management, Responsive web design with Material UI and Bootstrap CSS frameworks. React is my main tool but i also worked on some full stack applications and applications using databases and authentication. I also worked with the team on some projects.

PROJECTS

FOOTBALL APP

- The Football App project represents my clone of the popular FlashScore platform, built using technologies such as React, Firebase, JavaScript, Material-UI, and Redux. This web application allows users to track live scores, explore statistics, player details, and more. With features like favorites, goal notifications, player search, and league overviews, this app delivers a comprehensive football-following experience. Users can personalize their home screen with favorite leagues for quick access to relevant information.

CHAT-APPLICATION

- This chat application is built using React and Firebase Realtime Database technologies, enabling users to communicate in real-time and exchange messages efficiently and securely.

NETFLIX-CLONE

- This project is a Netflix clone created using the React library for the frontend, Firebase for the backend and authentication, and Stripe for payment integration.

EXPERIENCE

STUDENT INTERNSHIP

Institute for Development · Internship   **Jun 2023 - Sep 2023**

- During internship, I was an integral part of a dynamic team tasked with developing a web application. Collaborating with team members to design and refine the user interface (UI) for the web application, leveraging HTML, CSS, JavaScript, and React.
